

Accelerate your organization's impact with with Smart AI Governance – strategic, scalable, and built for trust

Our AI Governance Framework equips organizations to unlock AI value responsibly and with confidence through:

- **Prioritize High-Value AI Use Cases**
Quickly assess, score, and prioritize AI initiatives – with ResponsiAI - to focus investment where it drives the most business value while proactively mitigating risk
- **Embed Governance into Delivery**
Integrate lightweight risk, compliance, and value checks into existing PMO workflows—accelerating deployment while protecting the business
- **Empower Teams to Own AI Success**
Activate AI Councils, define clear roles, and deliver practical tools and training to build enterprise-wide ownership and momentum

CUSTOMER SPOTLIGHT

Embedded Scalable AI Governance to Unlock Enterprise-Wide Value

Pariveda established and embedded a NIST-aligned AI governance framework into core PMO processes, equipping a newly formed governance team to manage AI risk from idea to production. This enabled faster time-to-value, improved audit readiness, and drove alignment across the organization—resulting in over \$25M in recognized AI value and a scalable model that supports future growth across the AI portfolio.

RESPONSAI: OUR AI RISK & VALUE ASSESSMENT

AI Risk Assessment

Framework that helps organizations evaluate where existing and desired AI application fall on the risk continuum.

RISK DIMENSIONS	AI Risk to the Organization				
	Minimal (1)	Low (2)	Moderate (3)	High (4)	Very High (5)
SOLUTION TYPE	Off-the-shelf AI Solutions		Internally Developed – 3 rd Party Model		Internally Developed – Custom Model
DATA SENSITIVITY	No Organizational Data Used	Publicly Available Organizational Data		Organization Proprietary Data	Highly Sensitive Data with Regulatory Requirements
ACCESS	Internal IT Developers Only (Super Users)	Internal Trusted Team (Single Function, Single Revenue Project Team)	Internal Role Based Access (Cross-Functional, Across Multiple Revenue Projects)	External Vendors and Partners Access	External Customers Access
CAPABILITIES	No Decision Making	Advises and/or Makes Recommendations	Limited Autonomy	Makes Decisions with Limited Human Oversight	Fully Autonomous
QUALITY/ACCURACY	Errors Have Minimal or No Impact	Errors Cause Delays but Workarounds Available		Operational Disruption	Legal or Reputational Risk

+

AI Value Assessment

Framework that helps organizations evaluate where existing and desired gen AI applications fall on a value continuum

VALUE SCORE	AI Value to the Organization				
	Low (1)	2	Moderate (3)	4	High (5)
ORGANIZATIONAL ALIGNMENT	Limited Alignment		Moderate Alignment		Full Alignment
OPERATIONAL EFFICIENCY	Limited Optimization		Moderate Optimization		Excellent Optimization
FINANCIAL IMPACT	No Financial Impact	Limited Financial Impact (<\$250K USD/year)		Moderate Financial Impact (>\$250K to <\$1 USD/year)	Significant Financial Impact (\$1M+ USD/year)
WELL-BEING	No Effect	Limited Effect		Moderate Effect	Strong Effect

The answers to these 5 questions generate a risk score. In the custom scoring tool that Pariveda provides, each of these dimensions are weighted and factored into the overall risk score.

The answers to these 4 questions generate a value score. In the custom scoring tool that Pariveda provides, each of these dimensions are weighted and factored into the overall value score.
